ABOUT US

BM INSTRUMENTS SURGICAL is known for its quality. For Surgical instruments and Laryngoscopes / ENT devices and is an operated business that has been dedicated to providing healthcare professionals with the products they need to perform their arts since long. Our high quality, precision crafted instruments have been an essential product line to our worthy customers. We carry an exclusive range of Surgical Instruments, Surgical Instruments and Healthcare Equipments.

We are committed to providing a product line that guarantees quality and extraordinary value to the end user as well as a level of service, satisfaction, and cooperation that has become a hallmark of **BM INSTRUMENTS**. We have gained a reputation for offering unbeatable prices on branded items as well as outstanding customer service on all levels. Every single instrument is manufactured with great care. We are working hard for maintaining higher standard. Advanced techniques are used in manufacturing and finishing departments in order to make best products.

BM INSTRUMENTS is offering you huge selection of our products and much more for a fast growing number of customers. We make it easy for you to browse our products, place orders & benefit from our quality services

We assure you quality instruments, most competitive prices and shortest delivery time.

ABOUT LARYNGOSCOPES

What is it ?

A laryngoscope is an instrument used to examine the larynx. The classic laryngoscope is available with a variety of blade attachments and with/without a Fiber Optic light source. The trend regarding blades has/is moving toward the disposable.

Function:

Laryngoscope blades are used as the primary tool for examination of the interior of the larynx and for placement of an endotracheal tube.

Main Feature:

The Miller Laryngoscope Blade . . . The most popular of the straight types. The side of the flange is reduced to minimize trauma and the curve at the beak or tip is extended to improve lifting of the epiglottis. These improvements facilitate greater exposure of the larynx in difficult-to-intubate patients.

The Macintosh Laryngoscope Blade . . . The Macintosh is the predominate model of the curved blade types. During laryngoscopy, the tip or beak of the blade is compressed into the angle formed by the base of the tongue and the epiglottis, indirectly raising the epiglottis. Some sizes are available flangeless. Also available is a die-stamped or one-piece construction blade with a slightly expanded flange.

FIBER OPTIC GREEN SYSTEM REUSABLE

All blades in green system crafted from finest non-magnet stainless steel minimize the risk of contamination.

Cool and brighter light with no chance of tissue burning during long intubation procedures.

Superior quality of glass fiber optic gives maximum bright illumination to view the larynx of human body.

Removable light guide can be autoclave separately, which makes long life of blade.

Autoclave able at 134°C. 5 min, for 2000-3000 cycles at maximum light output.

All blades and handles are made to comply with ISO 7376, allow compatibility with existing blades and handles.

Complete range of handles also equipped with LED lamps.

LED technology has longer additional life time with 50,000 hrs and continuous 2 hrs operating time.

Brighter than Xenon lamp with 12,000 — 50,000 LUX transmission light at the tip of the blade.

globalreachtradings.com

STANDARD CONVENTIONAL REUSABLE BLADE

We have accommodated the whole range of conventional lamp blades into LED choice also, which protects the patient from accidental burns during lengthy procedures.

Standard Vacuum Lamp:

Reliable vacuum standard lamp of 2.5V for better illumination.

Conventional color temperature of 3000k @ 2000 LUX.

2hrs operating time with 20hrs life of lamp.

LED Lamp:

LED lamp gives continuous cool and bright illumination.

2hrs operating time.

Brighter than standard lamp with 12,000 LUX and also 85,000 LUX light beam.

Available with 6500k color temperature.

Longer additional life time with 50,000 hrs.

Whole range of blades complies with ISO 7376 standard.

Easily replace lamp at the front of the blade.

Autoclaved @ 134° C for 5 minutes.

Crafted from finest stainless steel AISI 303 & 304.

Round and smooth edges reduce the risk of injuries.

Macintosh Blade Fiber Optic illumination

Specification:

- ▶ Manufactured From Aisi 304 Stainless Steel
- ▶ All Blades Compatible With Iso 7376 Standard
- ▶ Autoclave Able.
- ▶ Available In 3mm, 4mm, 5mm Fiber Optic illumination
- ▶ Inserted Fiber Optic Technology For Advanced Performance
- ▶ Individual Micro-fibers For Improved Light Transmission
- ▶ And Longer Life. Smooth Shape Avoids Sharp Edges & Cavities For Easy Cleaning And Sterilizing.
- ▶ Extra-strong Removable Fiber Bundles To Ensure The Best Possible Light Intensity And Durability.
- ▶ The Clear Design Of The Macintosh F.o. Blades Simplifies Cleaning And Autoclaving. Fiber Optic Pipe Is Removable
- ▶ It Can Be Remove or Replace. Require Fiber Optic Handle.

ABOUT TUNING FORKS

The Fundamental Mode Of Vibration Is The Mode Most Commonly Associated With Tuning Forks, The Two Tines Of The Fork Alternately Move Toward And Away From Each Other, Each Bending Like A Cantilever Beam, Fixed At The Stem And Free At The Other End. This Is A Symmetric Mode, Since The Two Tines Are Mirror Images Of Each Other
